Open to Everyone / Casual discussion of sustainability-related issues: 30-minute talk by guest about his or her research and sustainability; remaining time = free discussion / monthly

# **SUSTAIN.CAFE** by **SUS-EDU**

## **Higher education for sustainable development in Africa:**

**Some reflection based on a UNU project**

### **04 Professor Masafumi Nagao**

*Professor Nagao is the Project Professor at the Graduate Program in Sustainability Science - Global Leadership Initiative, Graduate School of Frontier Sciences.*

*Since October 2008 United Nations University has worked with 8 leading African universities to establish a Master's level education program for sustainable development in Africa. I have been serving as a coordinator of this project. In this talk, I would like to raise some questions on the basis of this experience, especially concerning the role higher education institutions can, and perhaps should, play in promoting sustainable development.*
